

I do not support NAB's petition 04-160, I am a current XM subscriber and listener and I do not like the idea of someone else editing and controlling what I am paying to listen to. I live in rural Montana and used to live in central Florida. I enjoy listening to radio shows and news reports from central Florida to stay up on what is happening in the area. I also do not support the FCC's recent headhunting of radio DJ's and television shows that are deemed to be racey for the public airways. I feel if a show presents itself as adult and mature then the content will represent such. I feel these far right wing Christians and closed minded parents have no right to edit and influence what I listen to in my own time, and I am a registered Republican. If they do not like the content of a show simply change the station. As long as it is billed as an adult show then there should be no confusion as to what they might or might not hear. Ignorance is no excuse. If you were a good parent then you'd be careful when scanning stations or what not and "accidentally" come across one of these shows. The amount of the fines for committing an FCC offense sound ridiculous, and you never hear where these fines go to? It sounds to the general public, though I am sure the money goes into wages and upkeep and what not, that some people are getting fat off of this recent witch hunt for explicit radio and television. In my opinion lay off.
